

# ODIN RAPID DEPLOY GPU ANALYTIC KIT

Equip your events with SmartCam, the most powerful AI analytics today to improve your security and safety.

The Odin Rapid Deployment GPU Analytic Kit will revolutionize the way you approach event security. With SmartCam, the most advanced AI analytics available, you can equip your events with cutting-edge technology to ensure maximum safety and unparalleled security. Our kit requires just a simple plug-in power and network connection, and users can easily add analytics to existing camera networks.

## SmartCam Features:

- Crowd density per meter/yard
- Crowd flow across open area
- License plate detection
- Average vehicle speed
- Average area occupancy

Equipped with the world's most powerful AI computer our kits offer the ideal solution for a new era of video analytics. A high-speed interface with support for multiple sensors and up to 275 TOPS and 8X the performance of the last generation for multiple concurrent AI inference pipelines this GPU Analytic Kit brings true innovation, intelligence, and efficiency to your event security system.

## Highlighted Features:

- 18 inch monitor
- Scalable GPU option that can be designed to run multiple analytics across one or more cameras
- Keyboard / touchpad
- POE injector
- Power supply
- External cable connections

## Upgrade Options:

- Internal LiPo4 battery [for self-powered option]
- Rapid Deploy Remote Communications Kit

*\* Hardware kits available for purchase or lease. All analytics are licensed separately.*
